

CONTROL AT YOUR FINGERTIPS

Manage Your System from Anywhere

With the Sonitrol Mobile App, users have the capability to remotely and securely search for their facilities via map or text, manage system arming status, view and filter historical events, manage system users, view live video, and now, with TotalGuard™, use as a keypad and bypass arming violations.

The Sonitrol Mobile App is an effective, efficient and accessible tool that allows you to control your Sonitrol security system(s) from a mobile device. Easily check or change the arming status of all your doors at your facilities, view alarm events, grant or remove access to a new user, view video feed or playback video all from your Sonitrol Mobile App.

About Sonitrol

The industry leader in verified electronic security, Sonitrol's patented impact audio technology and integrated access control have the capability to verify the presence of intruders or authenticate valid employees to a facility.

Sonitrol has the fastest police response times, lowest false alarm rates and best apprehension rates in the security industry...over 178,000 criminal apprehensions and counting.
