

mySonitrol

Imagine this...

You're away from the office. You're looking at a real-time view of activity at one of your locations. You use the same tool to change the security access level of a recently promoted employee. Then you run a report to see who entered and exited each building in the past week, as well as review who has turned on or off the intrusion system at each facility and when. In a few minutes, you've had a comprehensive look at all of your security activity.

You may be out of the office, but you're never out of touch with mySonitrol

Manage your security anytime, anywhere with mySonitrol

Sonitrol offers complete security management with mySonitrol

mySonitrol offers unprecedented flexibility and control

See For Yourself

- Log-in to www.mySonitrol.com from any secure web-browser and gain access to your security dashboard
- Schedule automatic reports or easily run them when you need them
- Manage the access permission levels of every employee
- View live or archived video
- And much more

mySonitrol is a web-based security management tool that is innovative, reliable and easy to manage. With a few clicks of a mouse, you will be able to find all of the information you need in one place, from virtually anywhere, anytime you need it, via a secure web browser.

Flexibility

With mySonitrol, you can view and manage all of your locations from a single log-in via the web.

Control

Add/delete users, customize Access Control features and view CCTV cameras via internet-enabled DVR.

Choose the mySonitrol product that provides the features you need – **mySonitrol Standard** for intrusion alarm systems, and **mySonitrol Pro** for advanced intrusion, access control and CCTV.

mySonitrol offers two levels of access so you can choose the features that best meets your unique needs

With mySonitrol Standard, you get:

News & Customer Communications

- Product information
- Latest news

Account Information

- View systems & user status
- Assign user authorization levels
- Run reports (arm/disarm information and call list)
- Edit contact information
- View Central Station contact information

Alarm Dispatch

- View burglary or fire alarm dispatches

Benefits of mySonitrol Standard

- No dedicated equipment required
- Access information from multiple systems
- Quickly add/delete users and customer contact information
- Review system information as often as needed
- Easy to manage report formats
- View contact information for immediate system changes

With mySonitrol Pro, you get all the functionality of mySonitrol Standard plus:

Access Control System Management

- Schedule door lock/unlock times
- Access Search reports
- Time and attendance reports
- Manage access level configurations
- Schedule user access times

Video System Management

- Online access to live video
- Split screen monitoring of live video
- Integration with selected DVR's (with pause, rewind, fast forward capabilities)

Benefits of mySonitrol Pro

- Centralized authorization control for employees with access to multiple sites
- Arming Exceptions reports display when the system was armed/disarmed at irregular times
- Scheduling feature ensures appropriate security levels year round
- Video enables customers to 'see' what's happening onsite no matter where they are
- View archived video

OTHER SONITROL SERVICES:

Intrusion Alarm

Sonitrol detects the intrusion early and can often prevent break-ins before they occur

Access Control

Stop re-keying locks – take control of who accesses your location

Video Surveillance

Stop break-ins by leveraging the power of video surveillance to see criminal activities

Fire Detection

Around the clock monitoring of smoke and heat detectors, sprinkler systems, and pull stations
