Advanced Technology

Only SONITROL offers advanced impact-activated audio detection technology that trigger alerts faster than conventional motion alarms.

• More than 20% of our apprehensions occur before the criminal gains entry, whereas standard systems don’t trigger an alarm until the criminal is inside the facility.

• Uniquely comprehensive total floor-to-ceilling, wall-to-wall coverage protects you from break-ins, even via unconventional entry points.

• Customer online access gives you peace of mind, while our dedicated monitoring center maintains visual and audio surveillance around the clock.

Verified Response

SONITROL’s responsive monitoring framework guarantees better results and faster police response times.

• More focused monitoring—With fewer accounts per monitoring operator—80% fewer assigned accounts than the national average—our monitoring personnel focus on your facility and respond immediately to any threat.

• Real-time response—SONITROL’s audio based alerts allow us to assess a false alarm, confirm an alert, dispatch police, and give real-time information to officers responding to your incident or classify it as a non-dispatchable false alarm.

• Fast action—SONITROL is approved for use in verified response municipalities, which means police respond 400% faster to a SONITROL-verified alarm. Police arrive on the scene an average of eight minutes after a SONITROL alert, versus 17 minutes for a private security guard call and 45 minutes for non-verified alarms.

• Better results—With one apprehension every 111 minutes, a SONITROL system is your best defense against loss or damage.

Industry-leading Guarantees

SONITROL’s technology, service, and results allow us to confidently offer the industry’s most comprehensive warranty, which covers satisfaction, performance, service response, false alarm protection, and more. See your SONITROL dealer for full terms and conditions and find out why more customers choose SONITROL and stay with us long term.
THE SONITROL DIFFERENCE

Service-driven Innovation

More than fifty years ago, with the help of a police officer, SONITROL was founded with a goal of reducing false alarms and increasing criminal apprehensions. We’ve led the industry ever since. Our dedication to better and more effective security means we are always improving our products and expanding our coverage. With service in 180+ cities across North America, SONITROL offers cutting-edge security where and when you need it most.

ACROSS-THE-BOARD EXPERTISE

Many security companies specialize in one type of solution, but at SONITROL we are industry-leading experts in integrated solutions for intrusion, access control, video surveillance, and fire detection.

Audio Intrusion

SONITROL combines state-of-the-art technology with human intelligence to reduce false alarms and enable quicker response and better loss prevention.

- Our monitoring personnel watch fewer accounts so they can act fast when your facility is threatened.
- Our technology allows monitoring personnel to confirm incidents in progress so police respond immediately.
- With comprehensive audio and video coverage, monitoring personnel provide ongoing, real-time information to police responders.

Access Control

SONITROL access control integrates with your security system to allow you to track movement, restrict access, and set use parameters that make sense for your needs. Available as a fully managed or stand-alone system, SONITROL access control provides the value and flexibility you need.

- Limit access by location, door, and time.
- Monitor and analyze results through a detailed audit trail.
- Eliminate the expense of rekeying or changing locks.

Video Surveillance

Sonavision™ allows SONITROL operators to see and verify a break-in immediately, ensuring an even quicker, more effective response than audio intrusion alone. And you’ll have the flexibility to view your facility from anywhere in the world via remote internet access, tablet, or smartphone. That’s peace of mind.

- Seamlessly integrates with SONITROL-verified audio intrusion.
- Reduces false alarms.
- Allows real-time video review via the SONITROL mobile app.

Fire

SONITROL specializes in early detection and limiting loss. Our expert Central Station personnel monitor your facility around the clock, providing instant assessment and response that protects your property in the event of a fire.

- Our monitoring systems are UL-listed for fire detection.
- We provide both fire alarm design and installation.
- Keep your investment operating at peak strength with SONITROL testing and inspection service.

When it comes to protecting your facility, SONITROL’s technology, service, and results make us a leading choice nationwide. Find a SONITROL dealer near you by calling 1.877.SONITROL or visiting us online at www.sonitrol.com.
