

Warehouse & Distribution

Protect Inventory & Operations with Proactive Security

Warehouse burglaries rank among the highest-value crimes in the industry. The size and layout of these facilities often create blind spots for traditional security systems. Even with multiple motion sensors, vulnerabilities remain in ceilings and walls, which are now common entry points for thieves.

True protection requires more than basic intrusion detection. Integrated video surveillance provides real-time visibility across expansive spaces, while access control ensures only authorized personnel enter sensitive areas, closing the gaps traditional systems leave behind.

Challenges

Inventory losses from theft:
internal and break-ins

Operational disruptions & liability from accidents

Lack of real-time visibility in large buildings or across multiple entry points

High cost of downtime, insurance, and compliance failure

Vandalism and fire can be costly

Why SONITROL CORE?

Patented Audio Sensors
detect break-ins at the first sound of forced entry

24/7 Central Station Verification
reduces false alarms and speeds police response

Integrated Video Surveillance
covers docks, aisles, and storage racks

Access Control
protects entry points and high-value storage zones

Proactive Protection
reduces theft, improves safety, and minimizes downtime

Key Benefits for Warehouse & Distribution

Verified Intrusion Detection
Catch intruders the moment they attempt entry, not after losses occur.

Integrated Video Surveillance
Monitor large facilities and high-risk zones in real time.

Access Control
Restrict sensitive areas like docks, storage rooms, and offices.

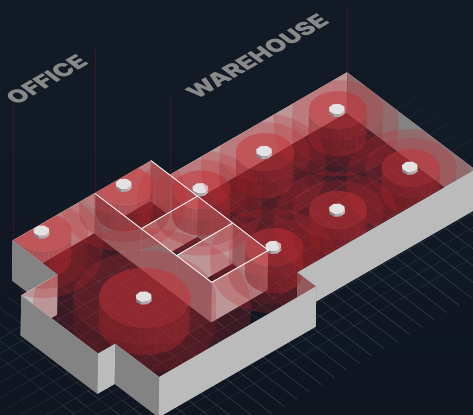

Faster Police Response
Verified alarms lead to priority dispatch and higher apprehension rates.

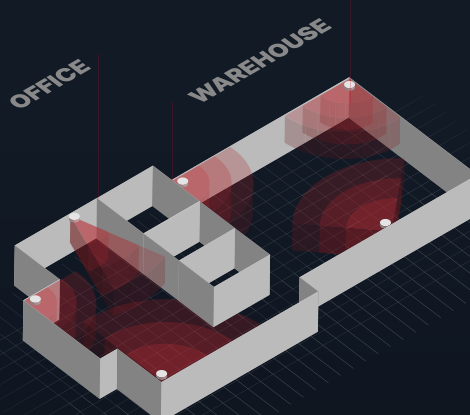

Scalable Protection
Secure one facility or an entire distribution network with centralized monitoring.

SONITROL Covers More Square Footage

SONITROL's Audio Detection Coverage
Wall-to-Wall, Floor-to-Ceiling, Volumetric Protection

Traditional Security System Coverage
Standard Protection offered with PIR motion technology only
