

HEALTHCARE FACILITIES

Safe Spaces for Patients, Staff, and Data

From hospitals and clinics to private practices, healthcare facilities must protect not only property but also people and sensitive data. With 24/7 operations, constant traffic, and strict privacy standards, healthcare security necessitates a proactive system that safeguards patients and staff without compromising care.

Safer Schools Start with Smarter Security

**Protecting patients
staff, and sensitive
records.**

**Multiple entry points
and 24/7 operations.**

**Equipment theft
and drug diversion risks.**

**False alarms
disrupt care
environments.**

Why SONITROL CORE?

**Audio Sensors
detect intrusions
immediately.**

**Verified Monitoring
ensures accurate
responses.**

**Video Surveillance
protects entrances
and storage areas.**

**Access Control
limits entry to
restricted zones.**

**HIPAA-Friendly
systems designed
for sensitive
environments**

Key Benefits

Detect intrusions
in sensitive zones with audio
sensors.

Minimize false alarms
in patient-care environments.

Monitor entrances
pharmacies, and storage areas.

Manage staff and visitor access
with ease.

Support HIPAA compliance
and facility safety goals.
