

FINANCIAL INSTITUTIONS

Verified, Layered Protection for Banks and Credit Unions

Banks and financial institutions demand uncompromising security by protecting assets, data, and customer trust. From lobbies and teller areas to ATMs and vaults, SONITROL CORE provides proactive protection that detects and verifies threats before they escalate, ensuring faster response and reduced loss.

Security Challenges

High-value assets and sensitive data.

After-hours break-ins and ATM attacks.

False alarms delay real police response.

Need for layered protection across branches.

Why SONITROL CORE?

Audio Detection catches break-ins at the source.

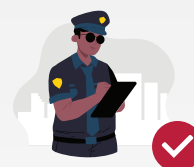

Verified Alarms speed police dispatch.

Video Integration monitors vaults and lobbies.

Access Control protects the teller and server areas.

Trusted Results: 188,000+ apprehensions nationwide.
