

GOVERNMENT BUILDINGS

Secure What Matters Most to the Public

Government facilities hold valuable data, sensitive materials, and the trust of the public. Protecting these spaces requires strict security that balances accessibility with safety. From courthouses and city offices to public works buildings, SONITROL CORE offers a verified security solution designed to meet the high standards of government operations.

Challenges

Sensitive data and assets require strict protection.

Multiple departments and entry points increase risk.

False alarms can disrupt essential operations.

Public access must be controlled and monitored.

Why SONITROL CORE

Patented Audio Sensors detect forced entry early.

Verified Alarms minimize false dispatches.

Video Surveillance covers entrances and common areas.

Access Control manages employee and visitor movement.

Scalable System supports multi-site government facilities.

Key Benefits

Detect intrusion the moment it happens with audio technology.

Eliminate false alarms with real-time verification.

Monitor lobbies, corridors, and perimeters with video.

Control employee and visitor access to secure areas.

Scalable protection for local, state, and federal sites.
