

Gym & Fitness Studios

Security That Keeps Your Memberships & Space Safe

Gyms and fitness studios operate long hours and often rely on unsupervised access. From locker room thefts to equipment vandalism, these facilities face unique challenges. High member turnover, multiple entry points, and large common spaces make it difficult for traditional security systems to provide complete coverage.

Challenges

Theft from lockers, equipment rooms, and storage for expensive equipment.

Vandalism after hours.

Safety of members/staff (especially during early or late hours).

Liability if someone is harmed or exposed to a threat.

Why SONITROL CORE?

Audio Sensors
detect forced entry in real time, even through ceilings or walls.

Verified Alarms
mean fewer false calls and quicker police response.

Video Monitoring
protects entrances, workout areas, and parking lots.

Access Control
manages 24/7 member entry and staff-only zones.

Safety & Trust
deter theft and improve security for members and staff.

Key Benefits for Gyms & Fitness Studios

Verified Alarms

Ensure quick response when intrusions occur.

Video Surveillance

Monitor lobbies, gyms, locker rooms, and exterior spaces.

Access Control

Manage member access and protect staff-only areas.

Member Safety

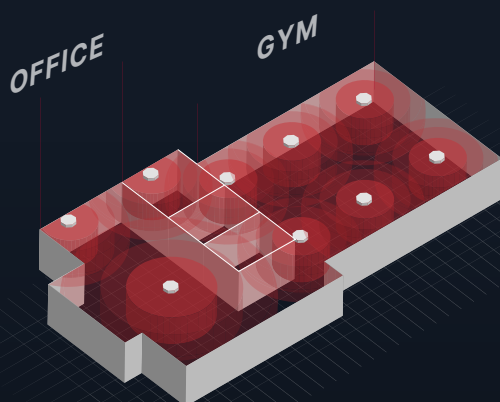

Deter theft and improve security after hours.

Operational Oversight

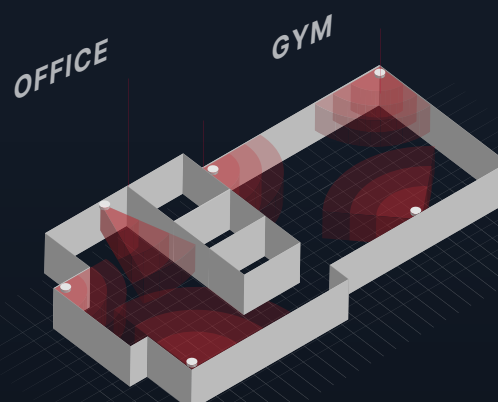

Track usage and monitor high-traffic zones.

SONITROL Covers More Square Footage
