

Industrial Facilities

Security & Safety in Harsh Environments

Industrial facilities face dual challenges: protecting people in high-risk environments and securing valuable equipment, materials, and intellectual property. Large perimeters, multiple buildings, and complex layouts make traditional motion-based alarms unreliable. Theft, vandalism, and safety incidents can disrupt operations and result in costly downtime.

Challenges

Safety hazards
around machinery,
moving equipment, and
hazardous materials.

Risk of sabotage,
theft of high-value
plant equipment or raw
materials.

Need to monitor large
perimeters,
multiple buildings, and
remote sites.

Compliance
with safety regulations,
insurance, and worker
protection.

Why SONITROL CORE?

Impact-Activated Audio

Sensors detect
smash-and-grabs
at the first sound.

Real-Time Verification

enables
faster police
dispatch and
apprehensions.

Proven Results

SONITROL has
helped catch
188,000+
criminals.

Video Coverage

protects displays,
storefronts, and
back stock rooms.

Access Control

secures vaults,
safes, and high-
value storage
areas.

Key Benefits for Industrial Facilities

Verified Intrusion Detection

Catch intruders before they disrupt operations.

Video Surveillance

Monitor perimeters, plants, and stockpiles.

Access Control

Restrict entry to production zones, labs, or hazardous areas.

Safety & Compliance

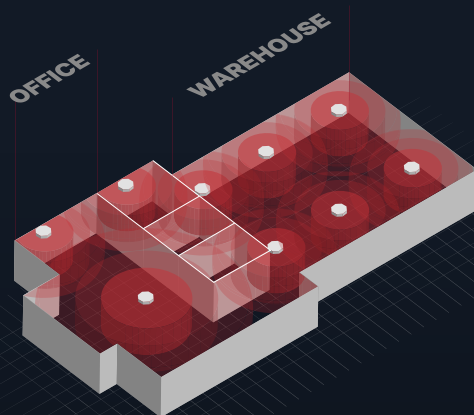

Support workplace safety and meet insurance standards.

Scalable Coverage

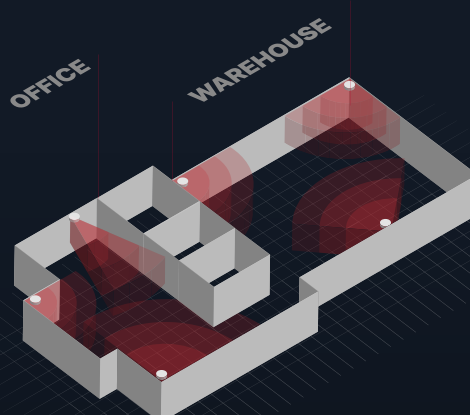

Secure one site or multiple plants with centralized control.

SONITROL Covers More Square Footage

SONITROL's Audio Detection Coverage

Wall-to-Wall, Floor-to-Ceiling, Volumetric Protection

Traditional Security System Coverage

Standard Protection offered with PIR motion technology only
