

Advanced Technology

Only SONITROL offers advanced impact-activated audio detection technology that trigger alerts faster than conventional motion alarms.

- More than 20% of our apprehensions occur before the criminal gains entry, whereas standard systems don't trigger an alarm until the criminal is inside the facility.

TotalGuard

- Uniquely comprehensive total floor-to-ceiling, wall-to-wall coverage protects you from break-ins, even via unconventional entry points.

- Customer online access gives you peace of mind, while our dedicated monitoring center maintains visual and audio surveillance around the clock.

Coverage is incomplete without comprehensive audio technology

Wall-to-wall, floor-to-ceiling volumetric protection using audio technology

Verified Response

SONITROL's responsive monitoring framework guarantees better results and faster police response times to your business.

- **More focused monitoring**—With fewer accounts per monitoring operator—80% fewer assigned accounts than the national average—our monitoring personnel focus on your facility and respond immediately to any threat.
- **Real-time response**—SONITROL's audio-based alerts allow us to assess a false alarm, confirm an alert, dispatch police, and give real-time information to officers responding to your incident or classify it as a non-dispatchable false alarm.
- **Fast action**—SONITROL is approved for use in verified response municipalities, which means police respond 400% faster to a SONITROL-verified alarm. Police arrive on the scene an average of eight minutes after a SONITROL alert, versus 17 minutes for a private security guard call and 45 minutes for non-verified alarms.
- **Better results**—With one apprehension every 119 minutes, a SONITROL system is your best defense against loss or damage.

Industry-leading Guarantees

SONITROL's technology, service, and results allow us to confidently offer the industry's most comprehensive warranty, which covers satisfaction, performance, service response, false alarm protection, and more. See your SONITROL dealer for full terms and conditions and find out why more customers choose SONITROL and stay with us long term.
